Subject: NPFC Discussion
Date: Saturday, September 23, 2017 5:22:05 PM

Bryant:

We need to make sure the discussion that we have are quick and productive. This should be the items that we discuss.

1. Should the spills be on the FPN or MA?
2. NOFI was issue on the Lumberton Spill. Is that an issue?
3. How do we track the costs for the specific incidents separately (EPA only has the FPN to capture contracts and EPA costs).
4. If ultimately pushed to the MA how do we keep the costs expended for each site shown independently (EPA issue).
5. If EPA is spending money on Community Liaisons and Field Observers, how do we make sure that we have enough MA money to move the FPN Costs back to the MA before the closing date of the MA?

Thanks
